

## Asbestos Detections at the Border

Data provided by Australian Border Force to the Asbestos Safety and Eradication Agency.

### July – December 2020.

| Month  | Number of asbestos tests at the border | Number of Detections | Asbestos types detected | Goods containing asbestos  |
|--------|--|----------------------|-------------------------|----------------------------|
| Dec-20 | 10                                     | 1                    | 1 x Chrysotile Asbestos | Vehicle                    |
| Nov-20 | 11                                     | 1                    | 1 x Chrysotile Asbestos | Vehicle                    |
| Oct-20 | 11                                     | 4                    | 4 x Chrysotile Asbestos | Vehicles and vehicle parts |
| Sep-20 | 16                                     | 0                    | 0                       | n/a                        |
| Aug-20 | 23                                     | 1                    | 1 x Chrysotile Asbestos | Vehicle                    |
| Jul-20 | 8                                      | 2                    | 2 x Chrysotile Asbestos | Machinery part, vehicle    |

NB –

The July – October 2020 statistics were first published early 2021 upon provision of data. They have now been updated to include November and December 2020.

The number in RED is a correction to previously provided figures. The previous figure was 8 (corrected to 11). Corrections happen from time to time as additional data is received from the regions.
